SUMMARY

To leverage my technical skills as a Full Stack JavaScript Developer to deliver exceptional service to clients, continuously enhance my knowledge, and thrive in a challenging, motivating environment that promotes growth and professional development.

WORK PROJECT

Omegle Clone　　　　　　　　　　　　　　　　　　**Dec 2024 - Present**

- Build an Omegle clone using JavaScript, Node.js, Express.js, MongoDB, and Mongoose. Features include video/audio calls with WebRTC, real-time chat with Socket.IO, and mute/camera off functionality.

OBYS Agency　　　　　　　　　　　　　　　　　　**July 2024**

- I created a responsive website using HTML, CSS, JavaScript, GSAP, and Locomotive. It features smooth animations, intuitive navigation, and showcases my front-end development skills.

Visionary-Architect　　　　　　　　　　　　　　　**May 2024**

- I created a highly responsive and dynamic website using React, GSAP, and Locomotive Scroll, showcasing seamless animations, engaging interactivity, and user-friendly navigation.
